

**08.09.10.**

Owen Pugh Equipment Sales has supplied its largest breaker to date by supplying a new Sandvik BR4099 to Owen Pugh Aggregates.

This breaker is one of the latest additions to the increasing Sandvik range and is fitted to our Hitachi ZX 470 LC and is used for both primary and secondary breaking in our Marsden Quarry at South Shields.

Quarry General Manager, Andy Mountford states “the machine and implement is a perfect match and production results are impressive and following the purchase of the pair we have eliminated the need for blasting”

For Sandvik enquiries please contact Phillip White, Mobile, 07713 789361.
