01.08.2011

Following excellent years of service from our last Volvo FH12 Tractor unit, we decided earlier this year to replace our large Low Loader.

The decision to purchase a new Volvo FH13, 6x4 tractor unit coupled to a new Faymonville 3 axle fully steered trailer was an easy one. This combination is plated to 80,000kgs and as the trailer is extendable by 4 metres it is more than capable of handling all our requirements.
