

Summer has seen the arrival of several new items of Plant equipment.

First delivered was this JCB JS 175W wheeled excavator. The machine replaces a JS145W and comes equipped with a hydraulically tilting ditching bucket, hydraulic services to operate a wide range of attachments and safety frame around the upper structure.

Next machine delivered was a Komatsu PC240LC. This is a high specification machine ordered specifically for a local business that will operate the machine on a Contract hire for the next 4 years. The machine is equipped extra hydraulic services, Auto lube, cab protection guarding, travel warning and guidance aids as well as a safety frame around the upper structure. This replaces an identical machine.

The last machine to arrive is this Caterpillar D6K LGP Bulldozer. The machine comes equipped with PAT blade and Cat 3 tine ripper. As with all machines in our bulldozer fleet, this machine comes equipped with Caterpillar's Accugrade Grade Control System. This allows for accurate grading on site which offers increased productivity and genuine cost savings to our customers.
