

OWEN PUGH

OWEN PUGH & CO LTD

07.02.2011

The New Year got underway with the delivery of this new JCB JS175W wheeled excavator. The machine is equipped with high and low flow hydraulics to enable it to operate a wide variety of attachments. It is also equipped with a hydraulic angling ditching bucket for greater precision.

This size of wheeled excavator is very popular with our customers thanks to the versatility of the machine. It is easily able to cope with clearing large volumes of material, lifting large objects during deep excavation works but have the ability to operate to fine tolerances. For more information, please contact our Hire Desk on 0191 2500315.
